

# Descarga de FreeBSD

Por: Jose Armando De Los  
Santos

# Paso 1: Entrar a la página Oficial de FreeBSD

The screenshot shows the FreeBSD website with a dark red header. The header contains the FreeBSD logo, the text 'The Power To Serve', a 'Donate to FreeBSD' button, and a search bar. Below the header is a navigation menu with links: Home, About, Get FreeBSD, Documentation, Community, Developers, Support, and Foundation. The main content area is titled 'Download FreeBSD' and includes a sidebar with links to 'Get FreeBSD', 'Release Information', and 'Ported Applications'. The 'Release Information' section lists production releases 13.0, 12.2, and 11.4. The 'Choosing an Architecture' section explains that most users will have hardware for either amd64 or aarch64 architectures. The 'Choosing an Image' section lists various formats like CD, DVD, and Network Install. The 'FreeBSD Deployment Statistics' section mentions the sysutils/bsdstats package. The 'FreeBSD 13.0-RELEASE' section contains a table with links to installer images, virtual machine images, SD card images, and documentation.

**Download FreeBSD**

**Choosing an Architecture**

Most users of FreeBSD will have hardware for either the amd64 or aarch64 architectures, which are well supported.

Modern PCs use the amd64 architecture, including those with Intel® branded processors. Embedded devices and single-board computers (SBCs) such as the Raspberry Pi 3 and 4, ESPRESSObin, as well as many Allwinner and Rockchip boards, use the aarch64 SD card image.

All other users should reference the [complete list](#) of supported FreeBSD platforms.

**Choosing an Image**

The FreeBSD installer can be downloaded in a number of different formats including CD (disc1), DVD (dvd1), and Network Install (bootonly) sized ISO Disc Images, as well as regular and mini USB memory stick images. Recent versions of FreeBSD are also offered as prebuilt expandable Virtual Machine images, and as SD Card images for embedded platforms.

**FreeBSD Deployment Statistics**

While FreeBSD does not gather deployment statistics, having statistical information available is essential. Please consider installing the [sysutils/bsdstats](#) package, which collects hardware and software statistics, helping developers understand how to best focus their efforts. The information collected is available at the [bsdstats.org](#) website.

**FreeBSD 13.0-RELEASE**
